Skills

- JavaScript | TypeScript |React |ApexCharts.js| Redux Toolkit | RTK Query |Git
- CI/CD | Postman| Unit Testing | OOP
- Microservices | Distributed Systems | Frontend | English, Urdu, Pashto– All professional proficiency or above

Experience

Web Developer　　　　　　　**Firefly TechSolutions**　　*Islamabad, Pakistan*　　**02/2023 - current**

As a Front-End Developer in a Firefly TechSolution , I specialize in crafting user-friendly web interfaces using **React,Tailwind, JavaScript**, and **TypeScript**. I collaborate with UX/UI designers and back-end developers to integrate and optimize web applications. Skilled in responsive design, I ensure our applications are accessible on various devices. I'm dedicated to continuous learning and applying new front-end technologies to enhance user experiences

METRO CASH & CARRY: In my recent project, I played a pivotal role in developing the front-end of Metro Cash & Carry's HR website, utilizing my expertise in **React** and **Redux Toolki**t. This involved integrating **RESTful API** using **RTK Query**, ensuring seamless data interaction and enhanced user experience. I also implemented Tailwind CSS for responsive and visually appealing design, contributing to an intuitive and user friendly interface. This project not only honed my technical skills but also underscored my ability to deliver complex solutions in a dynamic business environment.

Projects

- **METRO CASH & CARRY:** Designed a project aimed at Metro Pakistan, a leading supermarket chain, developing a web-based HR management solution.(12/2023)
- **LEAN UX PLATFORM: Final Year Project :** Using face and eye data improve user experience (02/2022)
